

Become a Tutor: Connect. Enrich. Grow.

Shaping Our Future Together

Have you ever taken a moment to think about what you know?

When you have, you were likely surprised. Chances are, you have skills in math, reading and writing beyond what you use every day. You may even speak a second language or have other skills that you simply take for granted. And right now, there are individuals who would love to know what you know and who need your help. Individuals whose futures could be significantly impacted by the sharing of your knowledge. Individuals who work alongside you every day.

Currently, we're looking for a variety of volunteers. Are you ready to step up and share your expertise with your colleagues through one-on-one tutoring? We already provide classroom learning at UMass Memorial, but we have so much more talent here to offer. Many of your fellow employees are interested in going to college and furthering their career and need your support and guidance. There's no better time for you to give back.

What's in it for you? Respect. A sense of accomplishment. The opportunity to grow. Gratitude from someone you have helped. But most importantly, the satisfaction you'll get by directly impacting the professional development of a UMass Memorial colleague who is dedicated to bettering him or herself by furthering their education. You may make a new friend!

There is not a large time commitment involved. A brief training, then a one to two hour per week investment for the academic year. You make your own schedule with your student partner and even agree on where to meet. Please strongly consider taking part in this rewarding program and to invest in the future success of a colleague.

Join the UMass Memorial Tutoring Program.

Please contact Human Resources, Workforce Development at 508-793-5250, press #5.
